AUTHORIZED DISTRIBUTION PARTNER

**BEAR-ENT**

German & American Made ENT Instruments

2026 EDITION

# ABOUT STERILE MATE

Your trusted medical infrastructure partner.

---

Founded in 2020 during the COVID pandemic, Sterile Mate LLC has evolved into a trusted leader in healthcare supply and services. As a Certified Minority Business Enterprise, we specialize in supply chain healthcare software for Implant Management and Rebate Tracking, janitorial disposables, AAMI ST108-compliant water filtration, and healthcare project management. We deliver high-quality medical products and innovative solutions sourced from leading manufacturers — ensuring seamless procurement and implementation for public and private healthcare institutions. From medical supplies to environmental services and water treatment, Sterile Mate is committed to **Keeping You Safe**.

## OUR BEAR-ENT PARTNERSHIP

---

Sterile Mate is a proud distribution partner for BEAR-ENT, a family-owned business supplying **German- and American-made instruments** for Ear, Nose, and Throat Practices, Surgery Centers, Hospitals and ENT Private Practices. BEAR-ENT (formerly mytaMed.com) has spent years finding the same quality instruments you buy from larger companies — without the overhead or middleman. This allows us to pass the savings on to you. If you don't find what you're looking for in this catalog, let us know — chances are we can find it for you.

## POWERED BY ASKISAAC

---

Every Sterile Mate order is backed by **AskIsaac** — our on-demand intelligence platform and command center, built to revolutionize communication between healthcare supply chain and the skilled trades behind facilities management. From a single dashboard, clinical and facilities teams submit quote requests, route backorder searches, dispatch work orders to vetted trades partners, and track turnkey installations in real time — eliminating the email chains, phone tag, and blind handoffs that slow hospitals down every day.

“After five years of service, I still find the greatest reward in the final mile of our operations. I frequently step into the field to personally oversee deliveries and installations to engage with our healthcare partners. Exceeding expectations isn't just our company's goal — it's a personal standard.”

— George Broughton, Founder & CEO, Sterile Mate
